

PASSING ON THE LEGACY OF GENERATIONS

We all want to pass good things on to our children. A good reputation. A solid inheritance. A rich legacy.

Have you considered passing on a rich family history going back generations? Or records and stories of your veterans and pioneers? Of the kings and princesses we know are there?

CCW Consulting offers you that amazing heritage to give to yourself and to your family and to the generations to come.

Christine Wynne, through CCW Consulting, has provided a detailed genealogy of my extended family's odyssey from Hungary through various states. Her detailed analysis uncovered relatives of whom I was unaware. Her work is detailed and thorough. I would highly recommend Ms. Wynne to anyone seeking detailed information of family roots. –Arthur Jacobs

Amazing! I now have seven complete generations, new cousins, and at least one 53rd great-grandfather! The tree has pictures of family and gravesites I have never knew existed. Thank you! — Clarke Campbell

You took what my mother had lovingly and laboriously begun so many years ago and followed it so much farther back. Adding copies of the documentation, pictures and stories has created such a rich legacy. — Janelle Reber

Your family's history is precious. Let CCW Consulting trace it and create a record of the legacy of those who journeyed before you.

JOURNEY THRU TIME AND PLACE

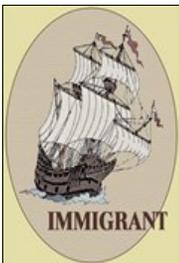

“All right! Everyone!
Out of the gene pool!”

Ever felt like screaming this at a family reunion? Have you ever wished you knew the truth concerning that family story about the horse thief or a lady of the night?

Ever wanted documented proof you *are* related to a Thomas Jefferson, King Henry, or some other famous person?

Do you know the date your ancestor(s) arrived in America and what was their actual country of origin?

Who are the immigrants in your family's past? Did they come as steerage passengers?

Was there an adoption in your family and a mystery surrounding it? Is there someone with whom you want to renew contact?

YOU ARE THE FUTURE

Think of tracing your family history this way: To the generations before you, you are the farthest forward they can reach to touch the future. What you provide in family history through genealogy research is the farthest your descendants will be able to reach to touch the past.

It dawned on me the day my mother died in 1990 — I was the matriarch of the family now. I realized what my family knows about where they have come from may determine where they go from here.

Expanding knowledge about your family's past will instill a special pride in the resilience, ingenuity, and courage of your forbearers as they faced the challenges of life long ago.

FILLING IN THE BLANKS

Do you know your family history back several generations but have unexplained gaps you haven't been able to fill in? Do you need pictures of gravesites or old homesteads? Do you simply want a copy of a birth certificate or some other official document and don't know how to obtain it? Do you want the history of the small town where your parents grew up 70 years ago? Do you simply want oral stories collected from your family and transcribed into a collection? Maybe you have old pictures you need scanned to a CD to preserve them. Projects make great anniversary, graduation, and wedding gifts. Imagine a 75th birthday. The honoree opens a present and lets out a cry at the book with five generations and its stories laying open before them.
